

# THE SPEAKERS VERSIONS

LES VERSIONS D'ENCEINTES

March 2026

# INTRODUCTION

Our loudspeakers are available in several finishing versions, designed to preserve the sonic identity of each model while offering genuine aesthetic freedom.

Each cabinet is crafted from carefully selected natural wood veneers. As every tree is unique, the tone, grain and visual character of each pair may vary slightly, which is part of its singularity.

Beyond wood species, we offer different combinations of tints, cerused finishes, piano finishes (RAL and NCS colour charts), as well as several grille cloth and top glass colours. This diversity allows each loudspeaker to integrate naturally into its environment.

This document presents the most common versions. Other variants can be considered on request.

-

Nos enceintes acoustiques sont proposées en plusieurs versions de finition, conçues pour préserver l'identité sonore de chaque modèle, tout en offrant une réelle liberté esthétique.

Chaque boîtier est réalisé à partir de placages en bois naturel soigneusement sélectionnés. Comme chaque arbre est unique, les teintes, les veinages et le caractère visuel de chaque paire peuvent varier légèrement, ce qui fait partie de leur singularité.

Au-delà des essences, nous proposons différentes combinaisons de teintes, de céruses, de finitions piano-laques (nuanciers RAL et NCS), ainsi que plusieurs coloris de tissus frontaux et de verres supérieurs. Cette diversité permet d'intégrer chaque enceinte avec justesse dans son environnement.

Ce document présente les versions les plus courantes. D'autres variantes peuvent être étudiées sur demande.
